micropython-gy521

Micropython library to interface to gy-521 (MPU-6050) 6DOF accel+gyro breakout board

- Free software: Apache Software License 2.0
- Documentation: https://micropython-gy521.readthedocs.io.

#### 1.1 Features

• TODO

#### 1.2 Credits

This package was created with Cookiecutter and the audreyr/cookiecutter-pypackage project template.

Installation

#### 2.1 Stable release

To install micropython-gy521, run this command in your terminal:

```
$ pip install micropython_gy521
```

This is the preferred method to install micropython-gy521, as it will always install the most recent stable release.

If you don't have pip installed, this Python installation guide can guide you through the process.

#### 2.2 From sources

The sources for micropython-gy521 can be downloaded from the Github repo.

You can either clone the public repository:

```
$ git clone git://github.com/jpvlsmv/micropython_gy521
```

Or download the tarball:

```
$ curl -OL https://github.com/jpvlsmv/micropython_gy521/tarball/master
```

Once you have a copy of the source, you can install it with:

```
$ python setup.py install
```

$\cap$ L	$\Lambda$	$D_{\perp}$	ГΕ	$\Box$	-
GΓ	ᆩ			П	

Usage

To use micropython-gy521 in a project:

import micropython\_gy521

8 Chapter 3. Usage

## Contributing

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given. You can contribute in many ways:

### 4.1 Types of Contributions

#### 4.1.1 Report Bugs

Report bugs at https://github.com/jpvlsmv/micropython\_gy521/issues.

If you are reporting a bug, please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

#### 4.1.2 Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with "bug" and "help wanted" is open to whoever wants to implement it.

#### 4.1.3 Implement Features

Look through the GitHub issues for features. Anything tagged with "enhancement" and "help wanted" is open to whoever wants to implement it.

#### 4.1.4 Write Documentation

micropython-gy521 could always use more documentation, whether as part of the official micropython-gy521 docs, in docstrings, or even on the web in blog posts, articles, and such.

#### 4.1.5 Submit Feedback

The best way to send feedback is to file an issue at https://github.com/jpvlsmv/micropython\_gy521/issues.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome:)

#### 4.2 Get Started!

Ready to contribute? Here's how to set up *micropython\_gy521* for local development.

- 1. Fork the *micropython\_gy521* repo on GitHub.
- 2. Clone your fork locally:

```
$ git clone git@github.com:your_name_here/micropython_gy521.git
```

3. Install your local copy into a virtualenv. Assuming you have virtualenvwrapper installed, this is how you set up your fork for local development:

```
$ mkvirtualenv micropython_gy521
$ cd micropython_gy521/
$ python setup.py develop
```

4. Create a branch for local development:

```
$ git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

5. When you're done making changes, check that your changes pass flake8 and the tests, including testing other Python versions with tox:

```
$ flake8 micropython_gy521 tests
$ python setup.py test or py.test
$ tox
```

To get flake8 and tox, just pip install them into your virtualenv.

6. Commit your changes and push your branch to GitHub:

```
$ git add .
$ git commit -m "Your detailed description of your changes."
$ git push origin name-of-your-bugfix-or-feature
```

7. Submit a pull request through the GitHub website.

## 4.3 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

- 1. The pull request should include tests.
- 2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function with a docstring, and add the feature to the list in README.rst.
- 3. The pull request should work for Python 2.6, 2.7, 3.3, 3.4 and 3.5, and for PyPy. Check https://travis-ci.org/jpvlsmv/micropython\_gy521/pull\_requests and make sure that the tests pass for all supported Python versions.

### 4.4 Tips

To run a subset of tests:

\$ py.test tests.test\_micropython\_gy521

Credits

## **5.1 Development Lead**
